

V-GROOVE STEEL SIDING | TS-S300-VG

# TerraGroove 300

Clean lines. Controlled shadow.

A refined interlocking profile that gives facades a disciplined linear rhythm in solid colours or natural wood-look finishes.

DESIGNED FOR ARCHITECTURAL EXPRESSION

## A sharper line for modern facades.

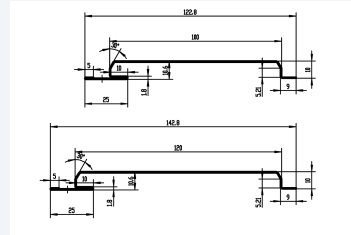

Distinctive V-shaped grooves create depth without visual clutter. Install TerraGroove horizontally or vertically across residential siding, commercial facades, soffits and interior feature walls.
